

Grades

For students and guardians.

The service *Grades* presents the student's grades in compulsory school and in compulsory school for students with intellectual disabilities for the latest four academic years. The school decides if and when the grades are published. If *Study plan* is available in your menu, grades in upper secondary school and upper secondary school for students with intellectual disabilities can be found there.

If some grades are missing, the reason may be that the school has not published the grades for the term, or that the student has attended a school run by another organiser, such as another municipality or an independent school.

Navigation

You can access *Grades* from the menu.

View the grades

To view the grades:

1. Select *Grades* from the menu.
2. If you are the guardian of more than one child, select child.

The latest grade in each subject is displayed. If the student for some reason has not received a grade, for example because the student has not studied the subject due to an adapted study route, "Grading basis is missing" is displayed instead of the grade.

When there are previous grades in any of the subjects, you can choose to show grade history.
